

FTP seq file to Vax

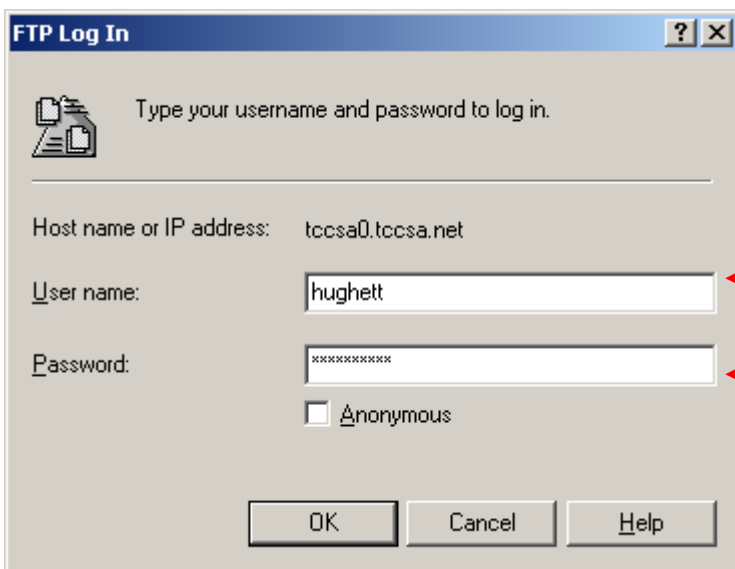

1. While in Reflections click on the icon that resembles a White sheet of paper from the standard toolbar.

You will then be presented with the following dialogue box:

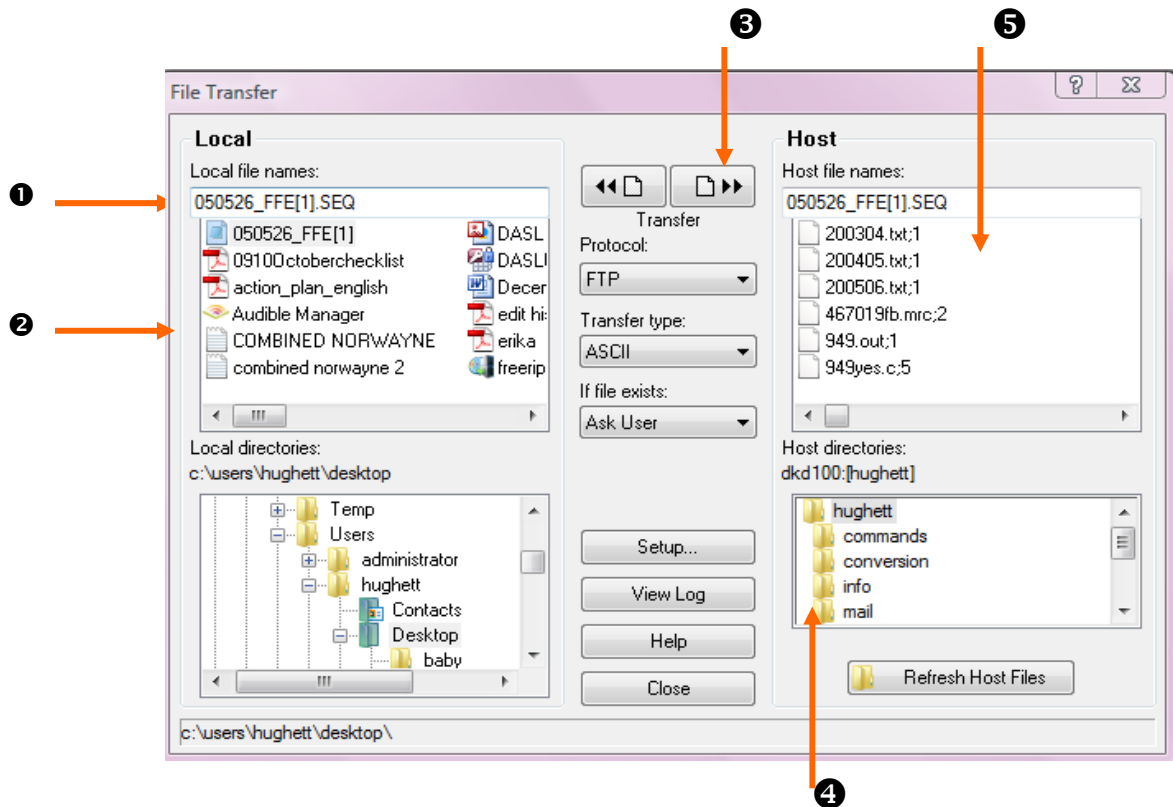

1. . Protocol Type = FTP
2. Click on Show Host Files

- Type in your username
- Type in your password
- Click on OK

FTP seq file to Vax

LOCAL

- 1 Filename to SEND to EMIS
- 2 Files to choose from your PC desktop
- 3 Transfer File button (right side)

HOST

- 4 This should be your Local Directory.
- 5 You will see the filename here if you refresh

1. From Local Side – Make certain you are on the desktop (where you put the file to transfer)
2. Click on the .SEQ file you exported from the flat file editor
Jot down the EXACT name of this file.
3. From the middle - Click on the RIGHT side transfer button to push the file over to the EMIS VAX side of processing
4. Click on close when finished.
