

Payroll Earning Codes

There are specific earning codes for the different types of contribution reporting in the new system. Different earnings codes may or may not require days and hours.

01 = Regular Contribution (JOBSCN position type = "R", "T" or blank).

02 = Supplemental (JOBSCN position type = "S". An example is a coach).

03 = Retro Pay (UPDCAL pay type of "BCK").

04 = Stretch Pay (UPDCAL pay type of "ACC" or "POF" with pay amount > 0) OR (UPDCAL pay type of "LPA")

Adjustments

51 = Adjustment to Regular Contribution of earning code 01

52 = Adjustment to Supplemental of earning code 02

53 = Adjustment to Retro Pay of earning code 03

54 = Adjustment to Stretch Pay of earning code 04

** NOTE: Adjustments are created from DEDSCN error adjustments and REFSCN amounts.

Earning codes 01-04 will appear on one output tape and all adjustments (earning codes 51-54) will appear on a separate output tape for SERS.

SERSDET-Earning Codes

Earn Code Values

- 01 = Regular (must have days/hours)
02 = Supplemental (must have days/hours)
03 = Stretch (cannot have days/hours)
04 = Retro (cannot have days/hours)
- 51 = Regular Adjustment (must have days/hours)
52 = Supplemental Adjustment (must have days/hours)
53 = Stretch Adjustment (cannot have days/hours)
54 = Retro Adjustment (cannot have days/hours)
